Make technology work for you

We help ship owners and managers leverage changing technology to **improve productivity, streamline operations and increase ROI** – especially during challenging market conditions and increasingly stringent compliance.

As a maritime focused software company we help our clients get the highest ROI on existing software investments and workflow, through simple integrations, new applications and plug-ins.

Our specialist maritime development team offer free requirement gathering sessions and can work with you to create **bespoke apps or integrations tools** which provide clever solutions to enhance existing workflow or legacy systems to leverage new technologies.

Our bespoke applications are deployed globally, with clients benefiting from:

- ✓ Quick to Deploy Solutions.
- ✓ Guaranteed **LOW TOTAL LIFE CYCLE COST**.
- ✓ Flexible contract terms – such as our **DEVELOP and LICENCE Offers** - with No Upfront Cost - We develop what you need and you simply 'pay as you go'.
- ✓ Dedicated project manager service.
- ✓ Free Training and 24/7 global support.

Find out how we can assist you to deploy 'easy to use', yet powerful solutions tailored to match your unique business needs by contacting us to arrange a **NO COST 'REQUIREMENT GATHERING' Session**
