

Inventory of Hazardous Materials (IHM)

Will your vessels be compliant with the EU regulations for IHM by the 2020 deadline?

An IHM is a document which identifies, locates and quantifies all potentially hazardous material on board a vessel that can pose a risk to the health and safety of people or to the environment.

All EU registered and all EU visiting ships above 500GT must have a certified Inventory of Hazardous Materials (IHM) on board by the end of 2020.

The vessel owner is responsible for the IHM which must be prepared by certified IHM professionals and is based on investigation, sampling, analysis, calculations and documentation.

Our IHM Consultancy Service

Our certified consultants provide IHM for vessels anywhere in the world, in line with Class Society requirements. Our team can handle IHM for both new and existing vessels.

- ✓ Collection of necessary information and documentation
- ✓ On-board visual inspection and sampling check
- ✓ Collected samples sent for laboratory analysis
- ✓ IHM prepared by our trained and certified personnel
- ✓ Submission of reports to Class office and request for
- ✓ Statement of Compliance (SOC)
- ✓ Follow ups with Class for on-board verification survey
- ✓ Ensuring SOC issued by Class upon satisfaction

Our IHM service is in accordance to the Hong Kong Convention, EU Ship Recycling Regulation (EU SRR 1257/2013) and MEPC.269 (68) Guidelines.

SDSD has supported the maritime industry with software and services since 1983
