

Procurement Management

The Procurement module is designed to optimize the full purchasing process and is fully integrated with the MAMS fleet management system

MAMS web-based Procurement Management is a user friendly, comprehensive module which covers the complete purchasing process including requisitions, request for quote (RFQ), supplier details, online quotations, quote comparisons, online approval, purchase orders and invoices. The system works as a standalone system or can be integrated with the MAMS planned maintenance and accounting modules.

Key Features include:

- ✓ Initial requisition creation and approval on ship and at the office
- ✓ Tender processing with auto email functionalities
- ✓ Direct RFQ email option for each selected suppliers
- ✓ Real time online quotations from suppliers
- ✓ Quotes comparison and approvals
- ✓ Purchase order and invoicing
- ✓ Budget creation and cost monitoring
- ✓ Automatic updates of Vessel Inventories upon delivery on board (PMS module)
- ✓ The module integrates with accounting systems including the accounting packages
- ✓ Inbuilt tracking and business intelligence tools for key analysis including Procurement Status report, Annual Budgeting and Budget Variance report (per vessel)
- ✓ Quick and efficient IMPA stores, spares and other consumable requisitions
- ✓ Integrated with ship inventory which provides info on stock on board and consumption history
- ✓ We can also provide fully trained procurement outsourcing staff, to take care of any your procurement cycle.

The MAMS fleet management software is customizable and is designed with the flexibility to meet your workflow needs.

SDSD offer flexible payment options including monthly subscriptions, and we do not charge for upgrades.

SDSD has supported the maritime industry with software and services since 1983
