

QHSE Safety Management

Vessel and Crew safety is of paramount importance to all maritime organizations. The MAMS Safety Management System is a comprehensive tool which enables vessel owners and operators to manage safety, reduce risk, to prevent human injury or loss of life, and follow best practices

Key Features include:

- ✓ Customizable safety workflow system based on company specific requirement.
- ✓ Record incident, accident, near miss and follow-up.
- ✓ Enter NC, observation and follow up (corrective action list).
- ✓ Root cause analysis for all safety related items.
- ✓ Corrective action request for break-down, COC items, etc.
- ✓ Provision to have emergency contact details (oil spill, port authorities, owner, manager, etc.)
- ✓ Master and chief engineer handing over take over.
- ✓ Safety meeting and follow-up.
- ✓ Master management review.
- ✓ All safety related reports can be customized to each shipping company and their specific regulations.
- ✓ Charts have a drill-down feature to allow users to move down to granular level data.
- ✓ Built in proactive safety alerts for informed decision making.
- ✓ The Safety Management System offers built in dashboards and charts to help end users including marine safety managers and Superintendents to analyze safety related records efficiently.

SDSD has supported the maritime industry with software and services since 1983
