Risk Assessment

Risk Assessment, along with the Safety Management module, is a comprehensive tool enabling vessel owners and operators to manage safety, reduce risk, prevent human injury or loss of life, learn and share company safety and risk policies and best practices, helping users meet OCIMF and IMO regulations.

Key Features include:

- ✔ Customizable Risk Assessment Matrix (3x3, 4x4 or 5x5) based on shipping company requirements.

- ✔ Customizable severity and likelihood factors.

- ✔ Preloaded risk assessment.

- ✔ Auto risk calculation.

- ✔ Risk reviews by shore staff.

- ✔ All safety processes can be monitored anytime via smart-phones and tablets.

- ✔ Integrated Risk Assessment with Planned Maintenance workflow. Also this can be subscribed as an individual module.

- ✔ Easy to use range of built in dashboards and reports.

- ✔ Drill down features to allow users to move to the granular level data as required.

The MAMS Risk Assessment module is a perfect tool to manage risk efficiently and reduce loss to human, machinery and environment.

SDSD has supported the maritime industry with software and services since 1983
