

V-Chartering

V-Chartering -Powerful and cost effective platform for Wet and Dry brokers

SDSD's next generation V-Chartering Dry and Wet platform simplifies chartering activities, ensuring you have access to the data you need whether in the office or via your tablet or smartphone.

With instant sign up and no hardware costs – V-Chartering Dry and Wet is the perfect tool for brokers looking for a quick and powerful yet cost effective tool. Designed to eliminate time consuming manual processes, the software matches cargo and vessels quickly, providing you with the key data you need to progress negotiations.

Key Features include:

-  User friendly way to track cargo negotiations and control deal stages
-  Intelligent quick search and detailed options with instant matching
-  Detailed matching parameters including cargo and vessel types, positions, capacity, zones, ports and many more
-  Data conversion and data entry services - keep your existing data
-  Data archive to keep track and report on past fixtures
-  Complete follow-up of your chartering activities including user activity
-  Comprehensive security and user access - keeping your data protected

A tough market needs you to react and respond fast – that's why SDSD's V-Chartering Platform is designed to help you work on the move via smartphones and tablets. With flexible subscriptions, no additional server or other hardware requirements and instant access – users can be up and running in no time. The software is intuitive to use and our Support team are on hand to help with any issues.

SDSD has supported the maritime industry with software and services since 1983
